

## **Nordsee One offshore wind farm reaches halfway point on turbine installation**

- More than 27 of 54 turbines now installed
- First wind turbines in trial operation
- Commercial commissioning of the 332 megawatt wind farm anticipated by the end of 2017

*Hamburg, 28 June 2017*

**The rotor for the 27<sup>th</sup> wind turbine was successfully installed last week at the Nordsee One construction site, located approximately 40 km north off the island of Juist. This marks the halfway point for turbine installation at the 332 MW wind farm.**

“In a football match we would now have reached halftime. However, at the Nordsee One wind farm, our work continues uninterrupted”, noted Tim Kittelhake, Managing Director (COO) of Nordsee One GmbH. “We are already in full swing, working on the second half of the project. Turbine installation will continue in parallel with the progressive commissioning of the wind turbines.”

Pierre Lestienne, Managing Director (CFO) of Nordsee One GmbH added: “To date we have successfully installed more than 27 turbines on schedule and on budget. The installed turbines are generating power and are already feeding green electricity into the grid. We are pleased with our progress so far, however we remain focused on reaching the finish line.”

All 54 foundation monopiles and transition pieces, as well as the offshore substation and infield cables, were successfully installed in 2016. The project team expects the installation and commissioning of all 54 Nordsee One turbines to be completed by the end of 2017.

Once completed, the Nordsee One wind farm will consist of 54 Senvion 6.2M126 wind turbines, with an overall installed capacity of 332 megawatts. Nordsee One is owned by Northland Power Inc. (85%) and innogy SE (15%).

### **About Northland**

Northland is an independent power producer founded in 1987, and publicly traded since 1997. Northland develops, builds, owns and operates facilities that produce 'clean' (natural gas) and 'green' (wind, solar, and hydro) energy, providing sustainable long-term value to shareholders, stakeholders, and host communities. The Company owns or has a net economic interest in 1,394 MW of operating generating capacity and 932 MW (642 MW net to Northland) of generating capacity under construction, including a 60% equity stake in Gemini, a 600 MW offshore wind project, also located in the North Sea. Northland's cash flows are diversified over four geographically separate regions and regulatory jurisdictions in Canada and Europe. Northland's common shares, Series 1, Series 2 and Series 3 preferred shares and Series B and Series C convertible debentures trade on the Toronto Stock Exchange under the symbols NPI, NPI.PR.A, NPI.PR.B, NPI.PR.C, NPI.DB.B, and NPI.DB.C, respectively. ### **About innogy SE**

innogy SE is Germany's leading energy company, with revenue of around €44 billion (2016), more than 40,000 employees and activities in 16 countries across Europe. With its three business segments Grid & Infrastructure, Retail and Renewables, innogy addresses the requirements of a modern, decarbonised, decentralised and digital energy world. Its activities focus on its 23 million customers, and on offering them innovative and sustainable products and services which enable them to use energy more efficiently and improve their quality of life. The key markets are Germany, the United Kingdom, the Netherlands and Belgium, as well as several countries in Central Eastern and South Eastern Europe, especially the Czech Republic, Hungary and Poland. In renewable power generation, the company is also active in other regions, e.g. Spain, Italy and the MENA region (Middle East, North Africa), with a total capacity of 3.7 gigawatts. As a leader of innovation in future-oriented fields like eMobility, we are represented in the international hot-spots of the technology industry such as Silicon Valley, Tel Aviv, London and Berlin. We combine the extensive expertise of our energy technicians and engineers with digital technology partners, from start-ups to major corporates. With planned capital investments of around €6.5- €7.0 billion (2017-2019), we are building the power market of the future and driving forward the transformation of the energy market. innogy was formed from the restructuring of the RWE Group and started operations on 1 April 2016. Its IPO in October 2016 made innogy SE Germany's most valuable energy company. innogy is colourful, flexible and full of energy – let's innogize!

### **Renewables**

With an installed capacity of more than 900 megawatts in offshore wind and with over 1900 megawatts in onshore wind, innogy is one of the major operators in Europe. We plan, build and operate plants to generate power and extract energy from renewable sources. Our aim is to take the expansion of renewables in Europe further in the short term, both on our own and working with partners. We believe that working together in this way is the key to making the energy transition a success. Currently, we are particularly strongly represented in our home market, Germany, followed by the United Kingdom, Spain, the Netherlands and Poland. At the moment we are focusing on continuing to expand our activities in onshore and offshore wind power. We are also looking at entering new markets and technologies, such as large-scale photovoltaic plants.
